About the studio-RAH

Studio-RAH was founded in 2015 and aptly chose the name "RAH", Ra-h: the path; believing in showing the way to your new design environment. We are proud of our diverse team of creative & experienced architects, engineers, consultants and contractors who strongly believe that design built environment should be personal, high quality and affordable.

Studio-RAH focuses on high standards in architecture & interior design. We believe in Accentuation+ Re-engagement+Habitat. The primary motto of our studio is accentuation of existing environment: culture, nature, climate with re-engagement: restoring and providing a sustainable design habitat to our clients. We believe in creating original, innovative and sustainable designs.

We seek to develop each project as its own specific identity by incorporating needs of our clients, as well as optimal spatial formation for every design.

We are responsive on smart concepts like home automation, green building design: GRIHA standards, energy consumption and reuse of waste materials. Our research team based in Massachusetts, USA works on integrating the research element into our design projects. We are dedicated to success of each project within a certain time frame.

About the team:

We are a diverse team of professionals including architects, researchers and interior designers educated and worked at reputed design institutes and firms around the globe.
